

How to Disable/Enable Startup Programs in Windows XP

HT30600006

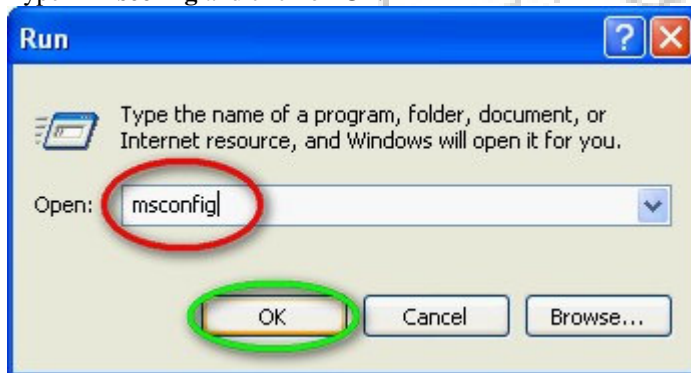

OS: Windows XP

Keywords: disable, enable, start, up, startup, program, windows, xp

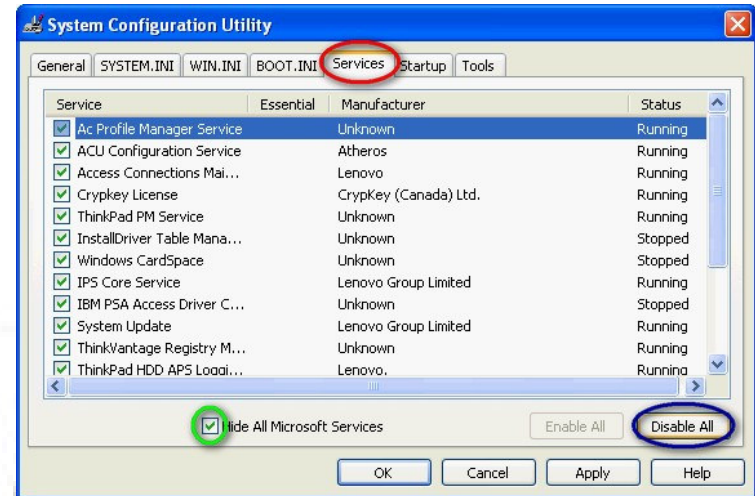

1. Click on **Start** and then **Run**.

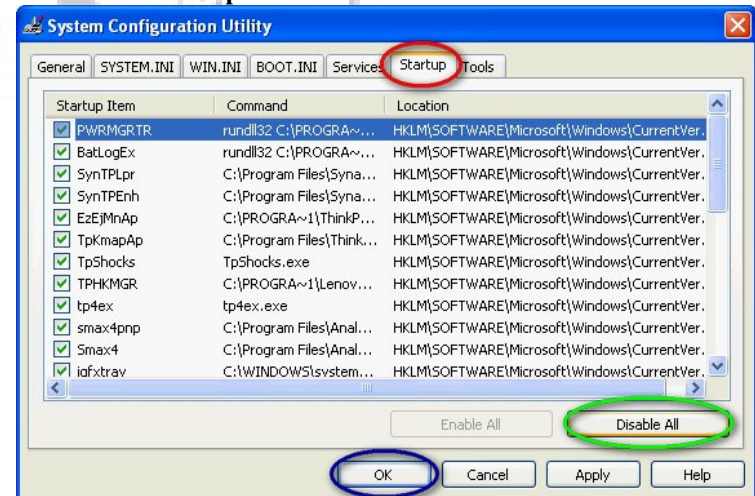

2. Type in **msconfig** and click on **Ok**.

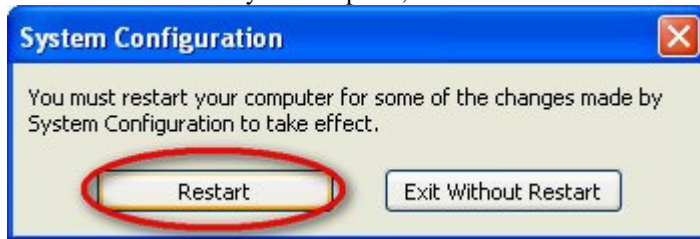

3. Click on the **Services** tab. Click to uncheck **Hide All Microsoft Services**. Click on the **Disable All** button.

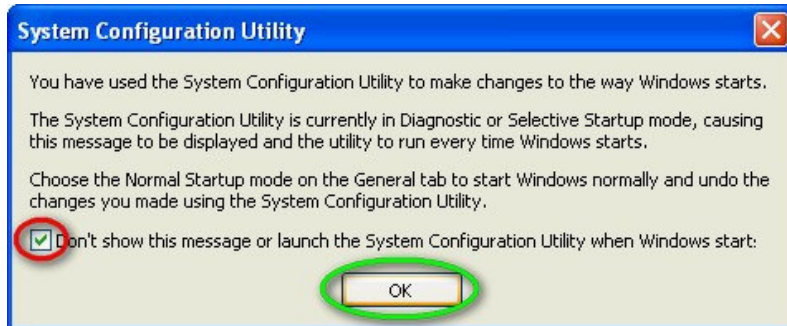

4. Click on the **Startup** tab. Click on **Disable All**. Click on **Ok**.

5. When asked to restart your computer, click on **Restart**.

6. When the computer restarts, click to uncheck **Don't show this message...**. Click on the **Ok** button.

7. To re-enable all of your startup programs, follow steps 1-2. Click on **Normal Startup**. Click on the **Ok** button. Follow step 5.
