

How to Disable/Enable Startup Programs in Windows Vista

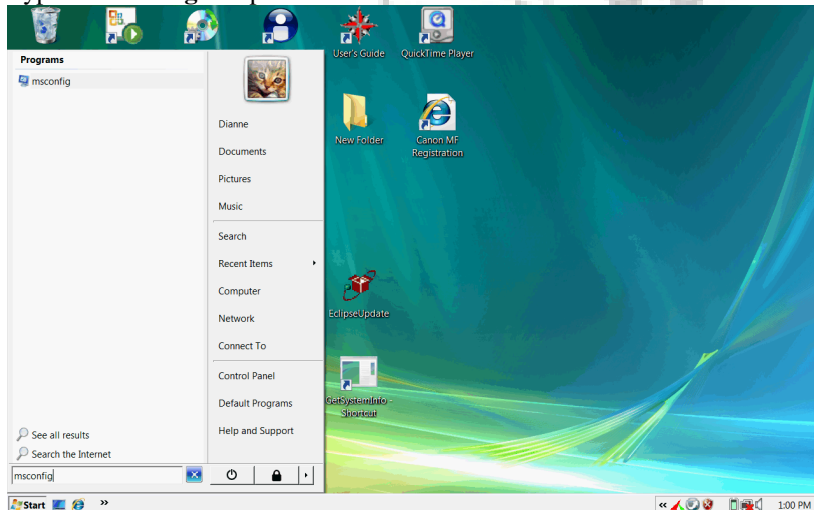

HT300004

Keywords: disable, start, up, startup, programs, windows, vista

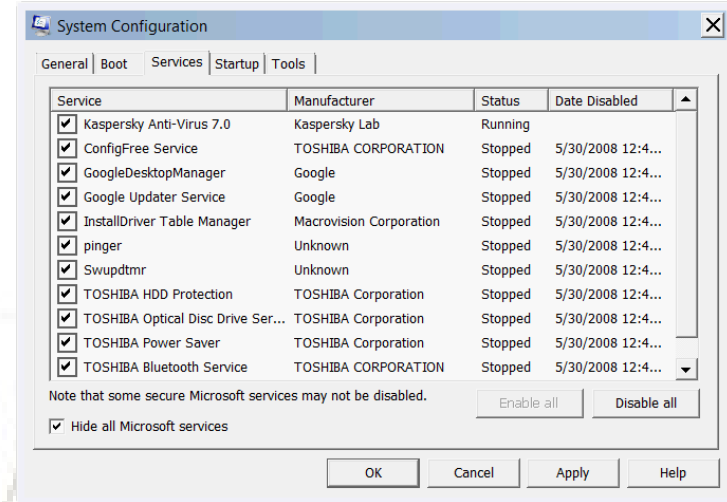

1. Click on the **Start** button (or **Windows Orb**). Click on **Start Search**.

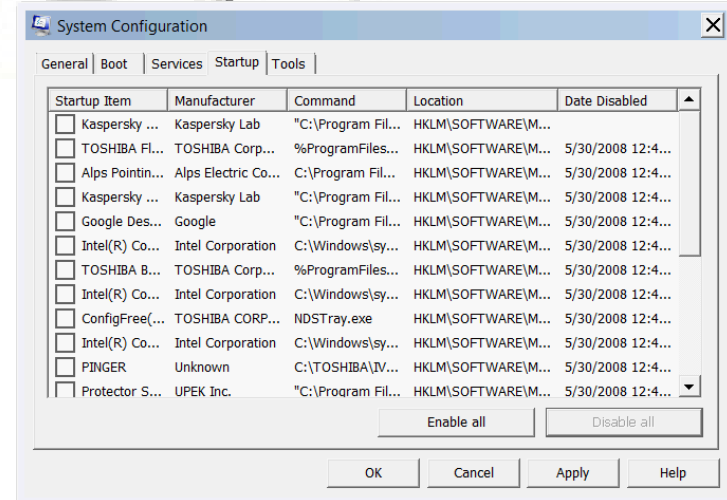

2. Type in **msconfig** and press **Enter**.

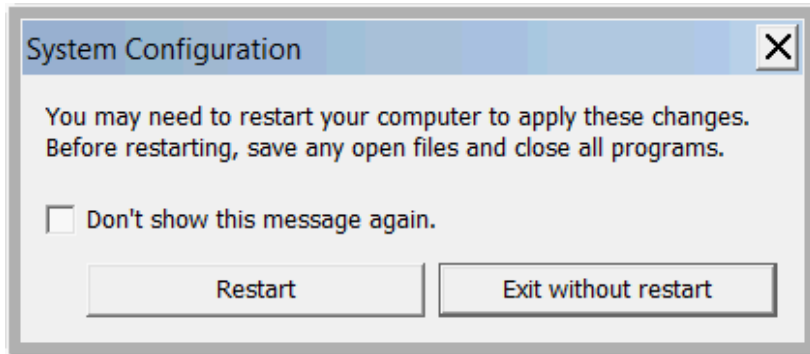

3. Click on the **Services** tab, and place a check next to **Hide all Microsoft services**. Then click **Disable all**.

4. Click on the **Startup** tab. Click on **Disable all**, and then **Ok**.

5. Click on the **Restart** button.

6. To Enable startup services, follow steps 1-2 to open **System Configuration**. Click on **Normal**, and then **Ok**. Click on **Restart**.
