

How to export user settings in DigitalCAT

HT41600001

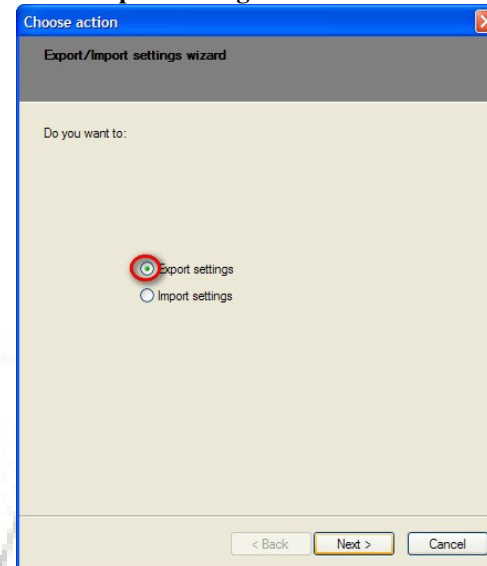

OS: Windows XP

Keywords: export, user, setting, digital, cat, digitalcat

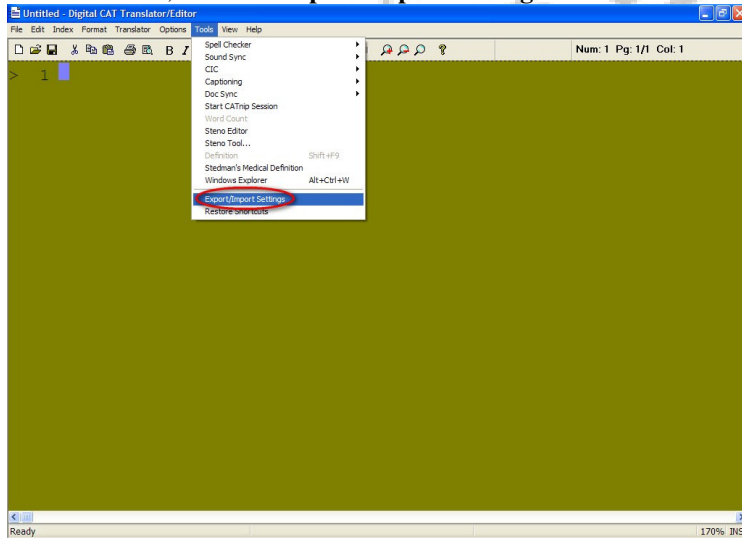

1. Double-click on **Transcript Editor**.

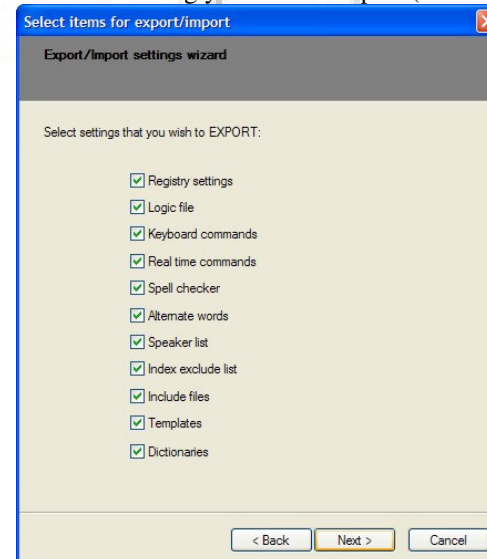

3. Select **Export settings** and click on **Next**.

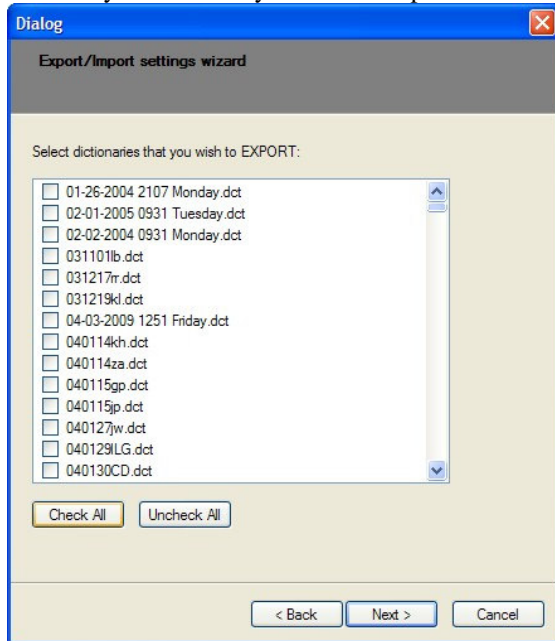

2. Click on **Tools**, and then **Export/Import Settings**.

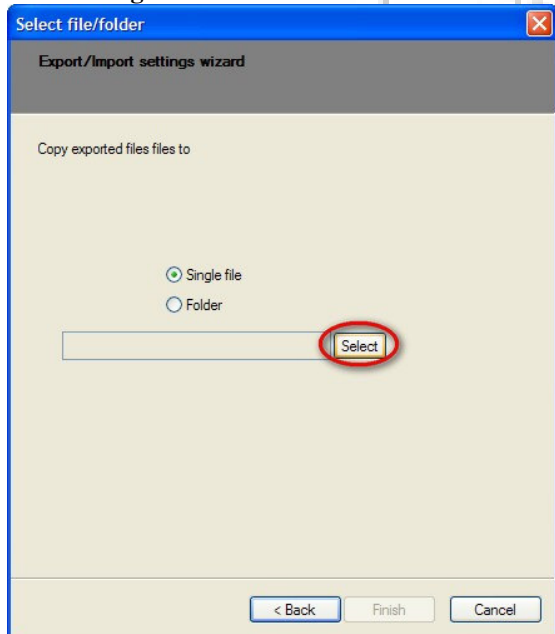

4. Select the setting you wish to export (all recommended). Click **Next**.

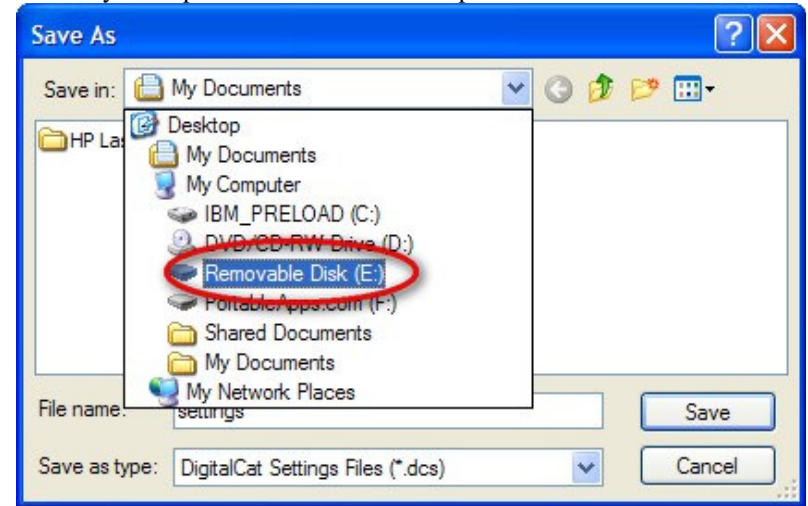

5. Select any dictionaries you wish to export and click on **Next**.

6. Choose **Single File** and click on **Select**.

7. Choose your export location from the drop-down menu and click **Save**.

8. Click on the **Start** button. When complete, click **Finish**.
